

Empowering Institutions to Build Future Ready Students

In today's evolving job market, bridging academic learning and industry expectations is crucial. Our AI-driven approach integrates training, assessments, and skill development to create future-ready graduates.

The Employability Gap

Industry Demand

63% of recruiters report freshers lack industry-required competencies.

Curriculum Gaps

Mismatch between academia and industry due to limited real-world exposure.

Placement Challenges

Traditional institutions have seen a 15% drop in placements.

Future-Proof Offerings

AI Skill Mapping

Automated, adaptive assessments for technical and non-technical skills.

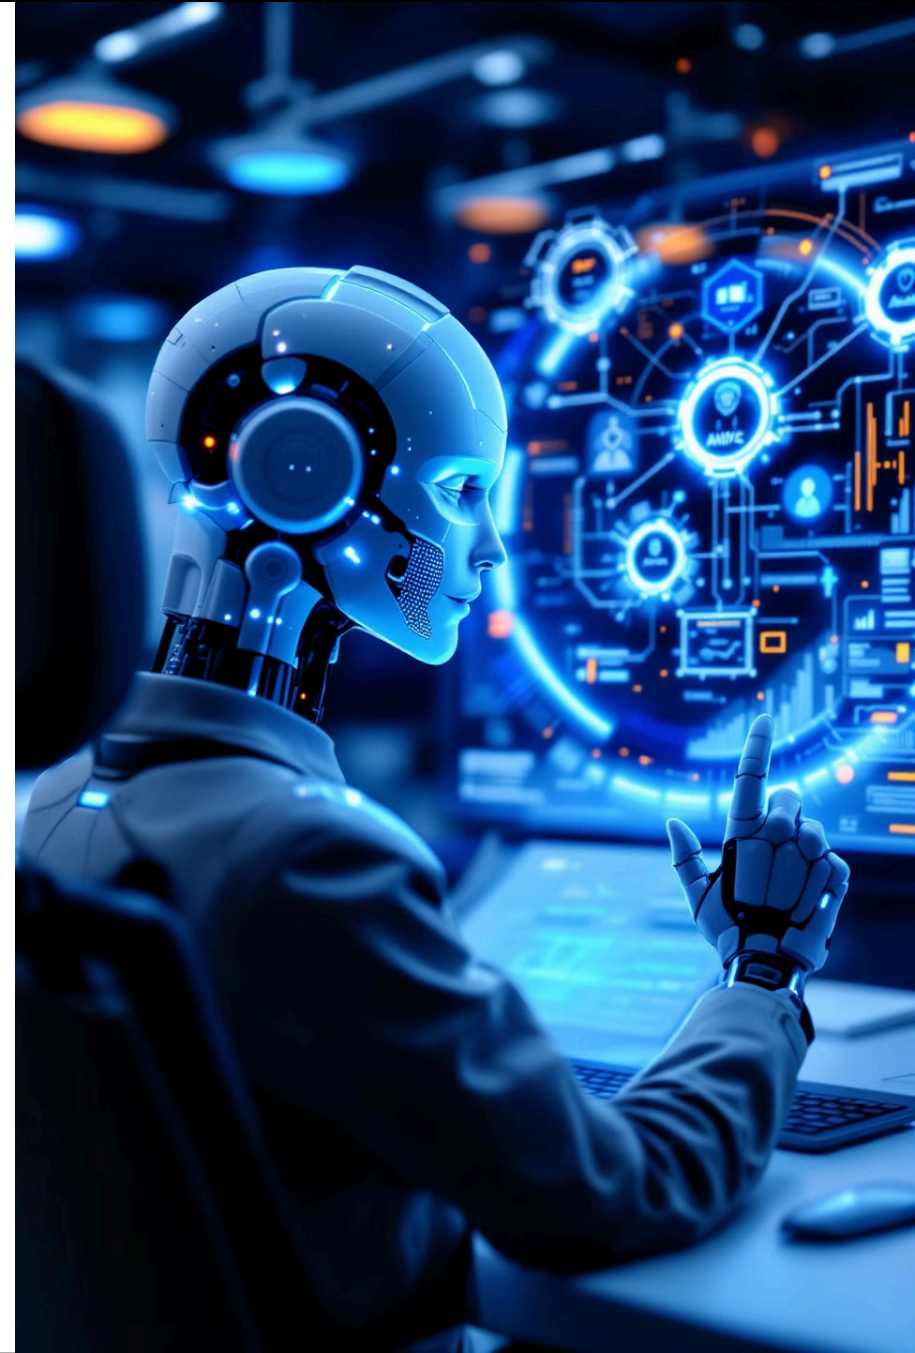

Hire Train Deploy

Role-specific training aligned with planned job requirements.

Industry-Aligned Micro-Credentials

Certifications from global industry leaders to create skill credibility.

Skillence Philosophy – Continuous Tracking

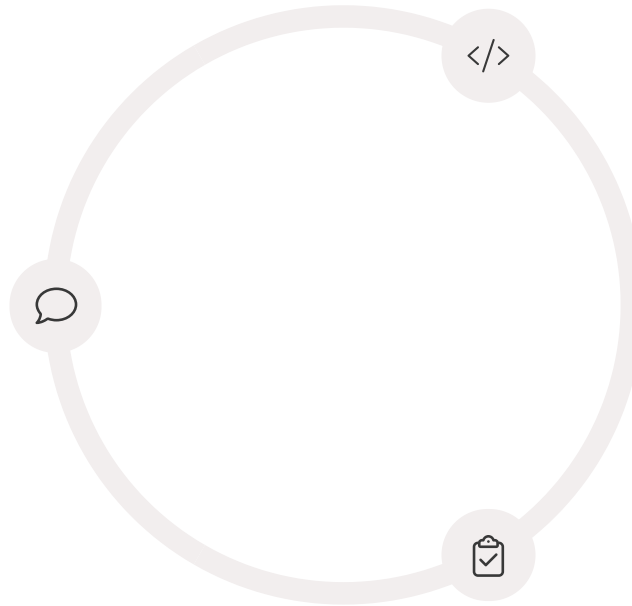

The Skillence journey culminates in achieving the mission of securing desired job placements through strategic, continuous improvement.

Curriculum-Focused Offerings

Non-Technical Focus Areas

Communication, leadership, and professional development skills.

Skill Specific Guidance

Hands-on technical and non-technical guidance aligned with industry needs.

Academic Evaluations

Standardized assessments to gauge academic proficiency.

Experiential Learning Approaches

Live Project-Based Learning

Hands-on experience solving real-world challenges from industry partners.

Freelance & Gig Economy Readiness

Training on platforms like Upwork, Fiverr, and Toptal.

Hackathons & Hiring Challenges

Competitive events and real-world problem-solving opportunities.

Student Journey

Registration & Goal Setting

Students specify target roles, companies, and preferred industry domains.

Benchmark Evaluation

Baseline assessment of technical and cognitive skills provides initial competency score.

Personalized Roadmaps

AI generates skill development plans based on assessment results.

Our USPs

Structured Skills Evaluation Approach

The platform evaluates candidates scientifically and identifies their improvement areas

Dashboards: Identify Improvement Areas

Individual and group-level analytics to discover candidate-specific paths and monitor overall progress

Personalized and On Demand

Proficiency level-wise recommended online learning for each candidate

Created by Industry Experts

Assessments created by industry experts aligned with latest industry needs

Industry Benchmarking

Trusted by industry, with 30+ companies accepting P-CAT scores for selection across job levels

In Depth Analytics

Uncovers learning needs at individual level and recommends improvements at branch and institute level

Continuous Improvement Cycle

Self-Paced Learning

Students progress at their own pace through recommended modules.

Competency Reports

Comprehensive reports showcase growth and readiness for recruiters.

Regular Evaluations

Ongoing assessments track skill development progress.

Targeted Feedback

Specific action points for further enhancement after each evaluation.

Institutional Benefits

Centralized Dashboard

Training & Placement Officers gain real-time visibility into student progress.

- Active student participation metrics
- Baseline competency scores
- Performance analytics

Strategic Planning

Institutions leverage insights to customize training programs.

- Data-driven decision making
- Industry benchmark alignment
- Targeted skill development

Partnership Model

Affordable Pricing

Costs less than a daily cup of coffee per student.

Investment in Careers

Focus on long-term student success rather than fee-based model.

Tailored Solutions

Custom-built programs aligned with institutional needs.

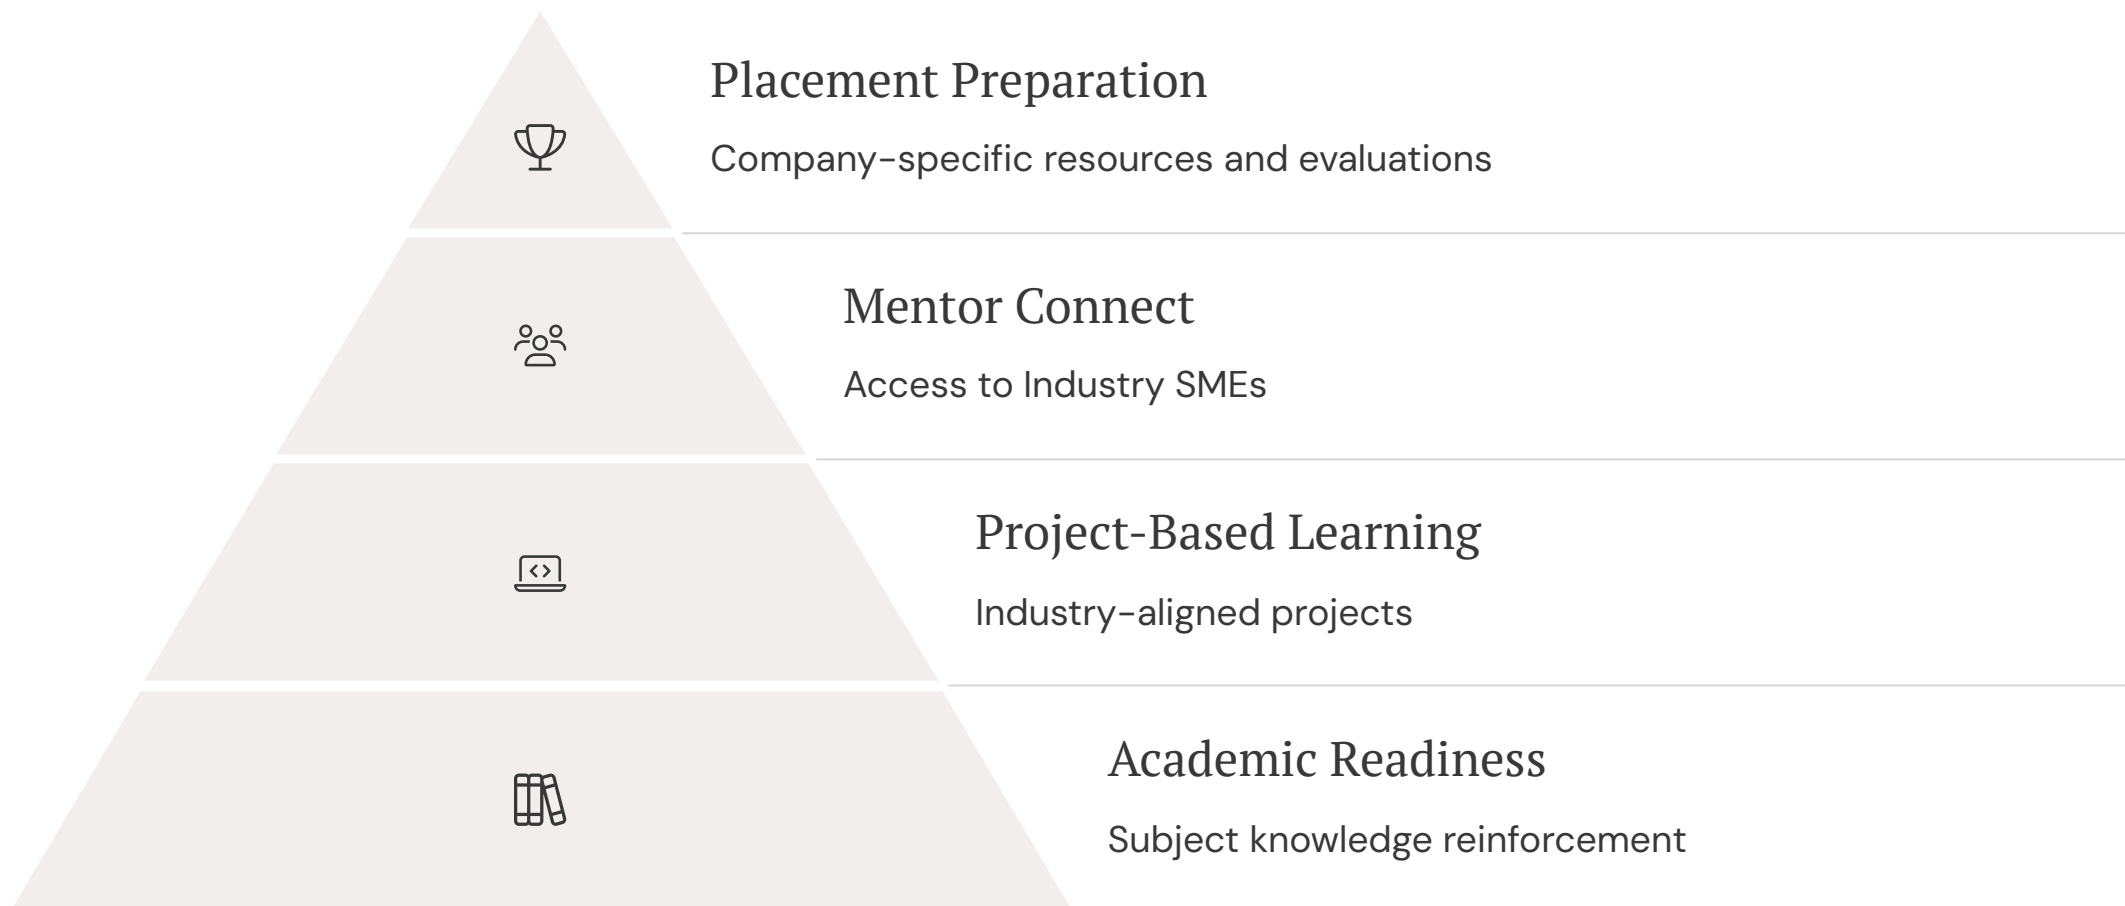

Seamless Integration

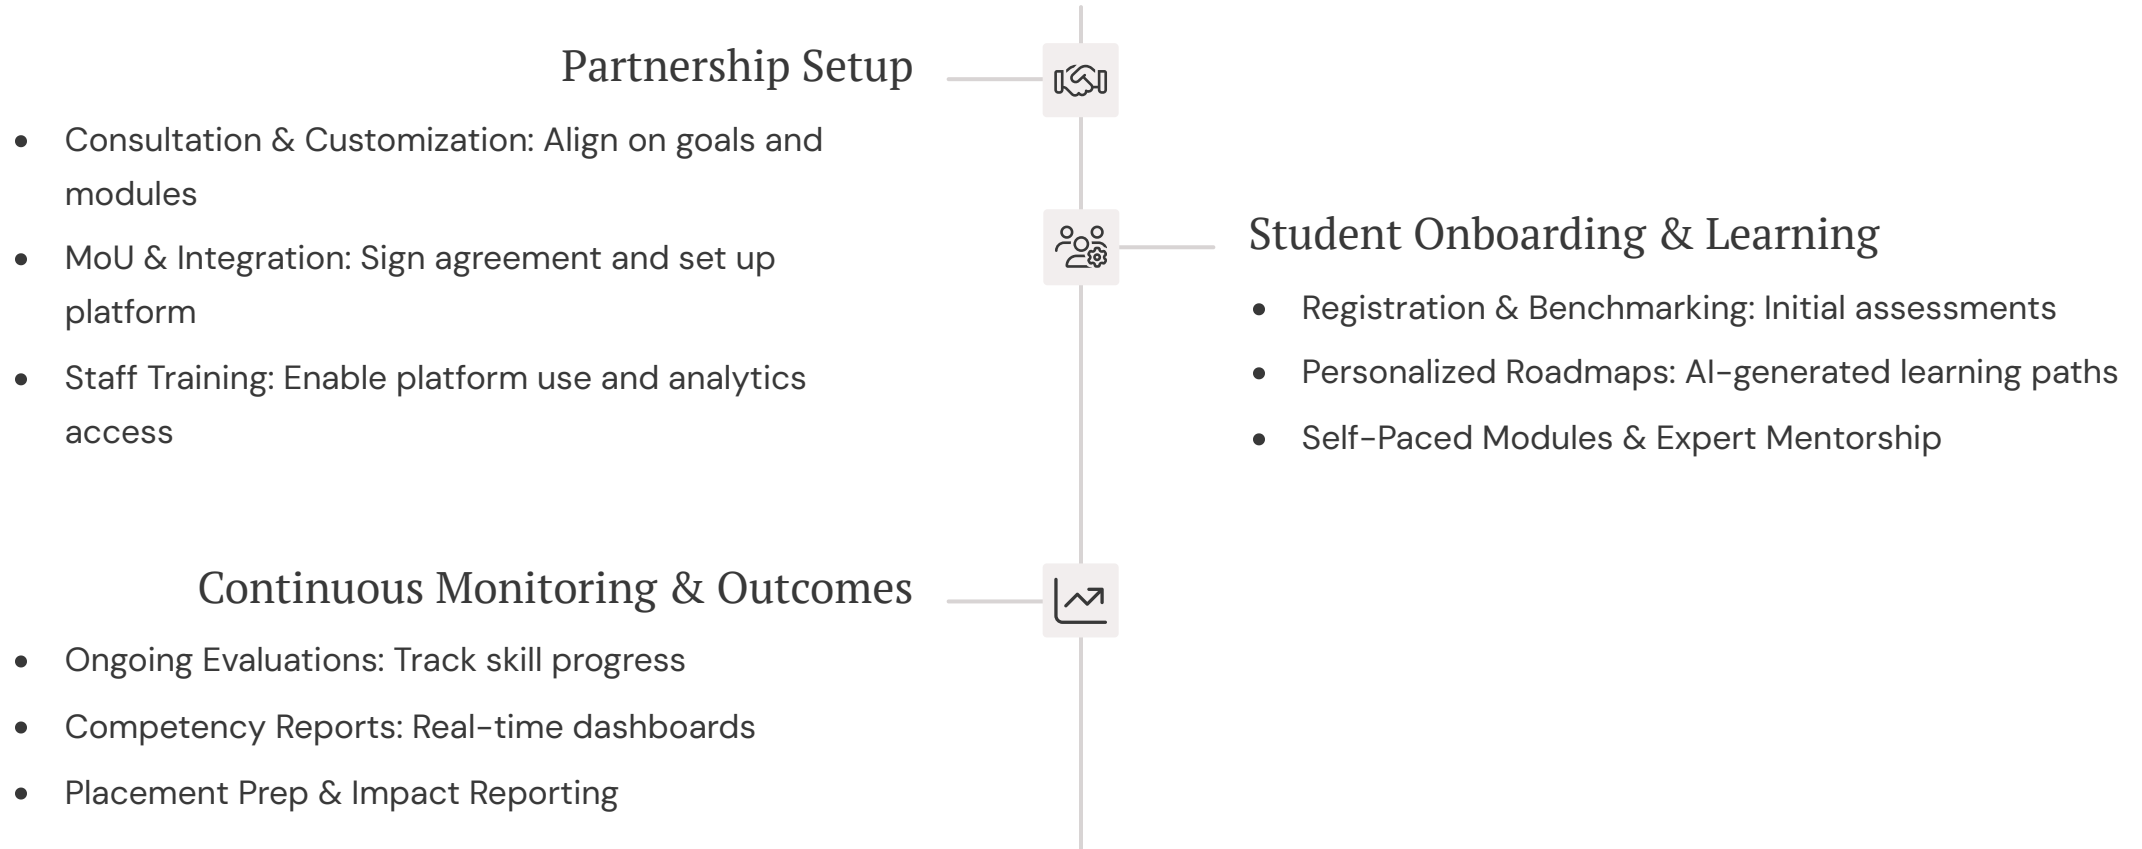

Works alongside existing academic curriculums.

Academic Support Features

Skillence Implementation Overview

Empowering Institutions to Build Future-Ready Students.

Timelines Variations

1 Quarter Program

Quick upskilling for final-year students with immediate placement focus.

- Intensive baseline assessments
- Fast-tracked learning modules
- AI project assignments
- Priority placement preparation

6 Months Program

Balanced skill-building with deeper project work and mentorship.

- Phased personalized roadmaps
- Self-paced learning with evaluations
- Complex project-based learning
- Analytics-based readiness review

Annual Program

Comprehensive academic-to-industry transformation journey.

- Extended technical and professional development
- Multiple evaluation checkpoints
- Full mentor and project access
- Curriculum-integrated industry growth

360° Development Ecosystem

1

Academic Foundation

Core subject knowledge

Technical Skills

Industry-relevant tools and technologies

Soft Skills

Communication and professional abilities

Industry Readiness

Real-world application and workplace preparation

Let's Collaborate!

We invite institutions to partner with us to create a future-ready workforce. With our assessment platform, skill-building programs, and placement services, we ensure students embark on meaningful career paths with confidence and competence.
